The human remains were removed from two sites in La Crosse County, WI.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3) and 43 CFR 10.11(d). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains. Consultation

A detailed assessment of the human remains was made by the Wisconsin Historical Society professional staff in consultation with representatives of the Forest County Potawatomi Community, Wisconsin; Ho-Chunk Nation of Wisconsin; Lac du Flambeau Band of Lake Superior Chippewa Indians of the Lac du Flambeau Reservation of Wisconsin; Menominee Indian Tribe of Wisconsin; and Upper Sioux Community, Minnesota.

History and description of the remains

In 1979, human remains representing, at minimum, one individual were removed from the Schaper Site (47-LC-0039) in La Crosse County, WI. The Wisconsin Historical Society conducted investigations at the site during a highway surface survey project that was part of a Wisconsin Department of Transportation Cooperative Agreement. The WHS crew found that the highway bisected one of the site's two mounds. Eroding from the cut bank of this mound they found human remains representing one juvenile individual of indeterminate sex. No known individuals were identified. No associated funerary objects are present.

Between 1969 and 1989, human remains representing, at minimum, two individuals were removed from the Krause Site (47-LC-0041) in La Crosse County, WI. The human remains were donated by the Mississippi Valley Archaeology Center (MVAC) in 1989 to the Wisconsin Burial Sites Preservation Office. MVAC reported the human remains as being collected over several years from different locations within the site. MVAC collected human remains in 1982 and again in 1989 during surface surveys of plowed fields, and additional human remains were donated to MVAC by local landowners and collectors who had collected human remains in 1969 and 1989. Skeletal analysis in 2015 determined that the human remains represent two individuals of indeterminate age and sex. No known individuals were identified. No associated funerary objects are present.
